

SEMINAR

Topic: How to toilet train your child in less than a day

Speaker: Dr. Kirsten Wirth, C.Psych., BCBA-D

Date/Time: Wednesday, June 10th @ 7-8 pm

Location: Bronx Park Community Centre, Computer Lab

Cost: \$25 +GST ea.

Who should attend: parents or caregivers of any children who are not yet toilet trained or have difficulty with toilet training.

Registration deadline: June 3rd

In this seminar you will learn signs of toileting readiness, things to prepare before starting training, and the most effective strategies for toilet training shown in the research to date. Tested by time, researchers, and practitioners with typical children as well as children with special needs, the rapid toilet training procedure remains the quickest and most effective way to train children. When used as designed, most children can be trained within a day, with some planning for maintenance and generalization for the next week or so. Get started before summer!

Space is limited so please register early.

How to register: simply go to www.wirthbehaviouralhealth.com/events, fill out the form at the bottom of the page, and you will be sent an invoice. All payments to be made by credit card unless otherwise arranged with Wirth Behavioural Health Services.

Questions or requests? Email dr.kirsten.wirth@gmail.com or call 204-807-6779.

Dr. Kirsten Wirth is a licensed psychologist and board certified behavior analyst-doctoral in private practice (www.wirthbehaviouralhealth.com), an Adjunct Professor in the Psychology Department at the University of Manitoba (www.umanitoba.ca/psychology), and the Governmental Affairs Chair, Founder, and a Past President of the Manitoba Association for Behaviour Analysis (www.maba.ca). She is also the author of "How to get your child to go to sleep and stay asleep: A practical guide for parents to sleep train young children," and the mother of two young children. Dr. Wirth writes a blog on evidence-based parenting tips at www.theinvestigatingparent.wordpress.com. She has over a decade of experience working with children, adolescents, and adults, with or without developmental disabilities and autism using, teaching, and training others to use ABA, decrease problem behaviors, and teach skills. Dr. Wirth has also been an invited speaker and presenter at local and international conferences.
